Field Spraying

- 50L large-capacity tank - Multi-Atomization Centrifugal Sprinklers ×2 (Standard) - 40L/min high flow rate for high-volume applications.
- 50-500μm adjustable droplet size
- Integrated mapping and field planning for automatic route generation in a single flight
- Max Operation Speed: 20m/s

Efficient Spreading

- 80L high-capacity spreading tank, one full bag per load
- 400kg/min high flow rate
- 10m effective spreading width for efficient operations - Five feeder types for seeding, fertilizing, and feeding
- High-Precision Weighing Sensor for precise application control
- Calibration-Free Flow Control with one-click material template loading

Ultra-Fast Charging

- Onboard Battery Heat Sink for cooling during flight
- 20Ah, DB1050 Intelligent Flight Battery - 30Ah, DB1580 Intelligent Flight Battery - Up to 1,500 charge cycles under warranty - Supports multiple ultra-fast charging methods
- D8000iE and D14000iE Multifunctional Inverter Generators
- C7000 Intelligent Power Supply with 380V Three-Phase Power Input

Comprehensive Protection, Worry-Free Operations

- All-new millimeter-wave radar for all-weather operational safety
- Quad-Vision System and AR Enhanced Display for more visibility and greater peace of mind
- Terrain Following Without Aerial Mapping for more accurate altitude stabilization and more stable terrain

Maximum Coverage, Minimum Time

- -100L spray tank with dual centrifugal sprinklers
- -Up to 40L/min flow rate and 13m spray width
- -20m/s max flight speed for rapid field coverage

High-Volume Spreading

- -150L hopper with 400kg/min discharge rate
- -Handles granules from 0.5mm to 10 mm—perfect for fertilizer, seed, and feed
- -Screw feeder system ensures uniform distribution across 3–10m widths

Heavy Lifting Mode

- -80kg payload capacity with a 10m lifting cable
- -Ideal for transporting irrigation gear, tools, or sampling kits across rugged terrain

Fast Turnaround

- -Ultra-fast battery charging keeps operations moving
- -Modular design for quick swaps and minimal downtime

Smart Tech for Smart Farms

- -RTK positioning with ±10cm accuracy
- -LiDAR terrain following and Penta-Vision obstacle detection
- -Real-time flow monitoring and automated calibration for precision application

70L Spay Tank

-The drone sprays at 30L/min with only two sprinklers.
-This drone sprays at 40L/min with the extended mist nozzles.

100L Spreading Tank

-The spreading tank spreads at 400kg/min.

Obstacle Detection

-T70P uses AR enhanced display for obstacle detection.

Operating Speed

-The T70P operates at a speed of 20m/s.

Lifting System

-The drone can lift 65kg with lifting system.
